Malone Postdoctoral Fellow, Johns Hopkins University

Malone Center for Engineering in Healthcare & Center for Language and Speech Processing
NE378, 6225 Smith Ave, The Johns Hopkins at Mt. Washington campus, Baltimore, MD 21209, USA

Research Interests

Human-AI Collaboration; LLM Agents; Multi-Agent Systems; Responsible and Trustworthy AI; AI-Assisted Qualitative Data Analysis; Human Aspects of Software Engineering

My research focuses on **human-AI collaboration for subjective tasks** where ground truth is limited or absent. I design, build, and evaluate collaborative systems along two directions: (1) *Bring AI to Humans*: integrating AI into workflows to help people perform subjective tasks more effectively (e.g., AI-assisted qualitative analysis, codebase comprehension, developer experience); and (2) *Bring Humans to AI*: bringing human oversight to autonomous AI systems to ensure they remain trustworthy and responsible (e.g., AI agent supervision, responsible AI). My work spans Human-Computer Interaction, AI, and Software Engineering.
